NO FERTILIZER TO BUY with GROW POWER PLANTER MIX

It's difficult to write about this new planter mix without superlatives because it's the nearest thing to a perfect planting medium ever devised. **More** - much more - than a potting soil and rich in nitrogen, phosphorus, potash, magnesium, calcium and all things a plant loves to eat, it actually can be used to feed and build soil . . . or for potting, if you want, you can dilute it up to 400% with sand, peat, etc. It's energized with **ActiveO** and therefore **ALIVE** with dynamic energy. Worth ten times as much as ordinary potting soil. Try a bag at \$1 (prepaid if your dealer doesn't have it; but insist on **Grow Power** brand) and if not delighted your money will be promptly and cheerfully refunded.
